Profile

A skilled full-stack developer with expertise in Django for web development and Flutter for cross-platform app development. Adept at crafting scalable, user-centric solutions, integrating emerging technologies, and solving complex problems with creativity and precision. Committed to delivering high-quality digital products that enhance functionality and user experience.

Work

Flutter Developer

2023/01 – present | Sangli, India

- Leading app development for a government-funded Med-tech startup, creating innovative, user-friendly Flutter applications to address critical healthcare needs and improve efficiency.
- Driving product innovation and strategic decisions as a co-founder, collaborating with multidisciplinary teams to ensure seamless deployment and adherence to industry standards.

Freelance Web Developer

2022/02 – 2023/05 | Sangli, India

- Engineered and deployed robust, scalable websites featuring intuitive UI/UX designs and efficient database connectivity, enabling businesses to enhance their digital presence and operational efficiency.
- Collaborated closely with clients to analyze requirements, develop tailored solutions, and deliver end-to-end web development services, resulting in improved user engagement and client satisfaction.
